

## CONFERENCE NOTICE

### AN INTERNATIONAL CONFERENCE ON FOREST GROWTH AND PREDICTION: AUGUST 24-28, 1987:

An international conference on *Forest Growth Modelling and Prediction* is scheduled for August 24-28, 1987 in Minneapolis, Minnesota. The meeting is sponsored by the International Union of Forestry Research Organizations Subject Group S4.01 Mensuration, Growth and Yield.

Over 100 papers will be presented on the development of all types of tree and stand growth modelling methodology including: model specification and parameter estimation; evaluation of models; incorporation of silvicultural treatments, site characterization, weather and other environmental perturbations; regeneration models; design of growth studies; and application of growth models in research and management including optimization methodologies. These papers cover all types of forests including tropical, temperate, and boreal regions. Posters, including software descriptions, will also be presented.

The conference is intended for scientists and practitioners developing tree and forest growth models and predictions.
