

REVIEW

BAMBOOS II

Compiled by L.M. Ridout

The COMMONWEALTH AGRICULTURAL BUREAUX's Annotated bibliography No. F 32, entitled, "Bamboos II" presents a collection of abstracts of 359 publications of 591 workers, entirely or partly pertaining to bamboos, originally in different languages, and appearing in Forestry Abstracts and other CAB Journals during 1978-82. The abstracts, which are grouped into 12 subject headings, include among other aspects, anatomy, physiology, taxonomy, ecology, diseases and pests, silviculture, management, properties and multifarious uses as well as author's index.

The bibliography, accordingly, indicated the prospects of research and development as well as management of this important resource, particularly for the developing countries with this resource economy.
